

MDSS II WPS EXPORT PROCESS

Date: 10 December 2008

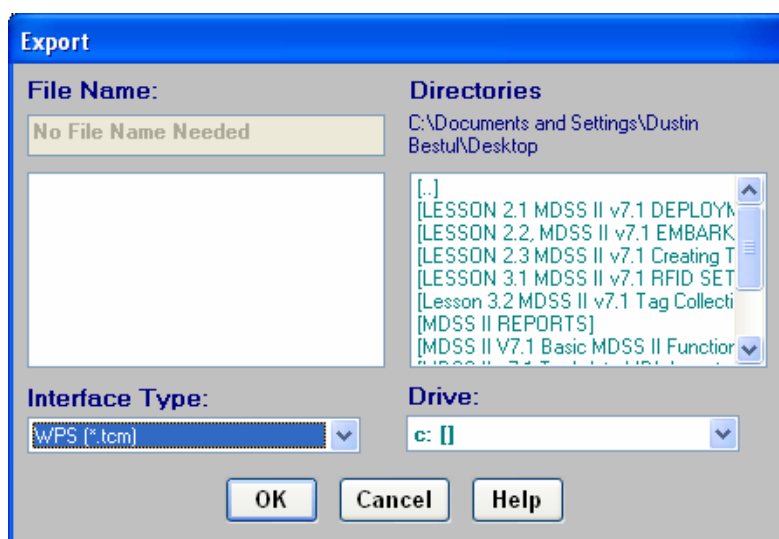

Quick Notes Objective: To provide the operational forces a concise guide on how to perform a specific task in MDSS II.

WORLDWIDE PORT SYSTEM (WPS) EXPORT

The WPS export provides an automated connection to transmit Transportation Control and Movement Document (TCMD) information. WPS is a single integrated cargo tracking and documentation system for the management of Department of Defense (DOD) sponsored cargo transiting ocean terminals under the control of the Surface Deployment and Distribution Command (SDDC). This provides an interactive, real-time connection between MDSS II and WPS.

NOTE: This is a how to guide, ensure you follow your MEF's guidance on requirements for the submission of the MDSS II-WPS export.

1. In MDSS II Using <Interfaces>, <Export>, select <WPS(*tcm)> and select <OK>.

2. The Mission Selection window will appear. Highlight the appropriate surface mission number and select <OK>.

MISSION NUMBER	ORIGIN	DESTINATION	CARRIER ASSET NAME
0001	QTUP	MMDL	USS WASP

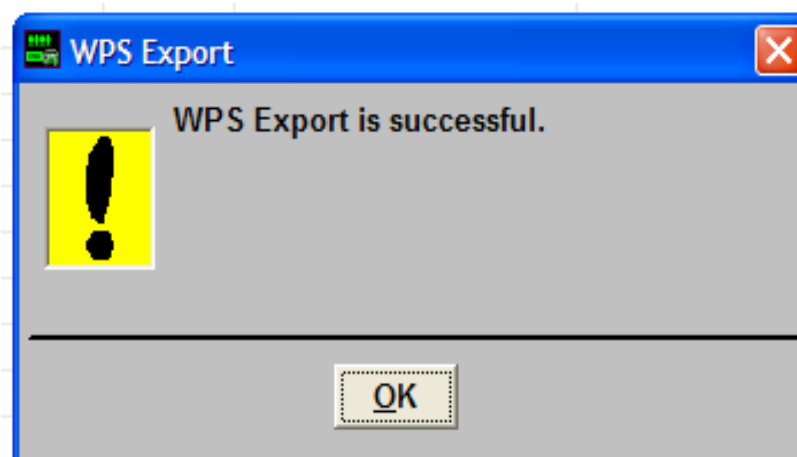

3. The “WPS Cargo Export” window will appear. Enter all the required shipment information. Refer to your higher headquarters for the appropriate information for each block. The <Required Delivery Date>, <Transportation Account Code> (if not provided, recommend to use “MSAM”), <Carrier Code>, <Ship Date>, <Estimated Arrival Date>, <Voyage Document Number> (Provided by SDDC) and select <OK>.

4. The “**WPS Export**” window will appear. Stating the TCMD has been created. Select <YES> to continue with the WPS Export.

5. The “**WPS Export**” window will appear stating that the export was successful. Select <OK>.

6. TCNs are only generated for the UDL records of the mission selected for the WPS Export.
